

# Salvia Skyscraper™

## PGR Scheduling Recommendations

Propagation:

3-week-old liner after 4 ppm paclobutrazol drench

Apply 4 ppm paclobutrazol drench at 2 weeks. Pinch in week 3-4.

Plant liners into final container at 4-5 weeks. Recommended for 6" and larger containers.

Apply 5-10 ppm paclobutrazol drench 2 weeks after Transplant.

Crop time from pinched liner 4-10 weeks dependent on season and container size. Skyscraper is a fast-growing and vigorous salvia.

Time to apply final paclobutrazol drench
