WELCOME TO YOUR DIANTHUS

Grow-to Guide!

See page 3 for your dianthus idea guide!

The Selecta One® dianthus collection includes hardy landscape varieties, grab-and-go gift items and compact potted varieties that look delightful on a patio or coffee table.

Turn to page 21 for our Root & Sell directory.

Purchase your rooted liners from licensed Selecta One Root & Sell locations. Authorized growers are found throughout the U.S. and Canada.

Visit page 19 for your scheduling chart.

Make scheduling dianthus easy! Just select your finish week in our chart and *you're good to grow!*

Key

- 2 early
- 3 standard

☀️ Heat Tolerance

- A excellent
- B very good
- C good

YOUR TICKET TO UPGRADED DIANTHUS SUPPLY

Selecta One® is **USDA approved** to supply dianthus cuttings from offshore production into the United States.

Here's your opportunity to:

- Receive any quantity you need, all in one shipment.
- Offer your customers plants for every occasion.
- Keep your costs down and your profits up.

USDA-Certified Offshore Production

Selecta One is certified by the U.S. Department of Agriculture's Animal and Plant Health Inspection Service (APHIS) as an approved offshore dianthus production farm.

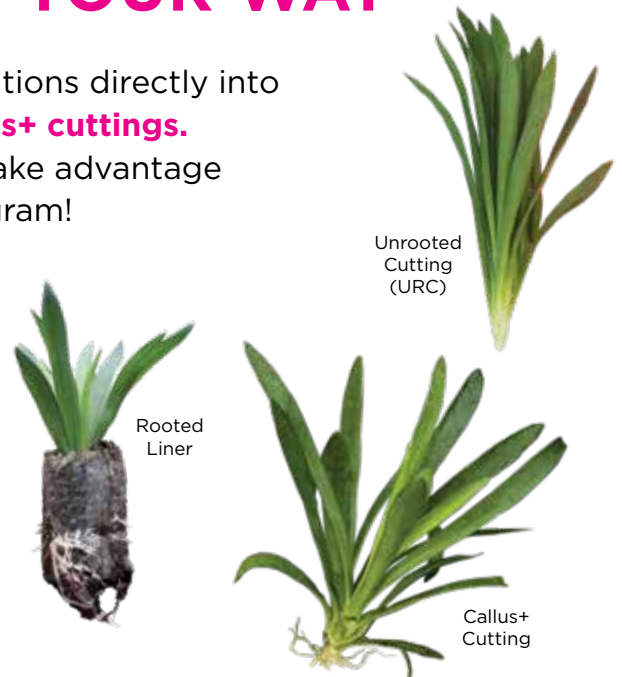

GROW YOUR Dianthus YOUR WAY

We fly dozens of varieties of dianthus and pot carnations directly into the U.S. and Canada as **unrooted cuttings and Callus+ cuttings**. We also offer **rooted liners** at a supplier near you. Take advantage of our product range to broaden your dianthus program!

Save time and money with Callus+ Cuttings.

- Save money by eliminating IBA rooting hormone expense.
- Reduce propagation time by at least 2 weeks.
- Reduce waste by achieving 100% rooting success.
- Reduce risk with proven success from extensive North American trials.

THERE'S A *Dianthus* FOR THAT!

Shop annuals, perennials, outdoor pots and indoor pots for gift-giving occasions, and in-ground varieties for cut flowers and landscapes.

Series	Indoor/ Outdoor Potted	Landscape	Perennial	Annual	Flower Type	Size/ Habit	Pot Sizes	Description
Capitán™		✓	7a	✓	Double	Upright	2.5 qt., (2.8 L) 8 to 14 in (20 to 35 cm) planters	<ul style="list-style-type: none"> • Large, vigorous plant. • Can be used as a cut flower. • Great in ground and in containers. • Long season flowering.
Carmen™		✓	5b	✓	Double	Medium Upright	1 to 2.5 qt. (1 to 2.8 L)	<ul style="list-style-type: none"> • True carnation. • Excellent uniformity. • Blooms continuously until frost. • Overwinters better than others.
DiaDeur™	✓		6a	✓	Double	Medium Upright	6 in. to 2.5 qt. (1 to 2.8 L)	<ul style="list-style-type: none"> • Fully double blooms. • Fragrant flowers. • Multicolored blooms. • Ideal for container and garden use.

GROWING GUIDELINES

PROPAGATION

- Choose a well-drained medium with an EC of 0.75 to 0.80 mmhos and a pH of 5.5 to 5.8.
- Dianthus cuttings should be stuck on the day of arrival. Cuttings can be stored overnight at 39 to 45°F (4 to 7°C). Soaking the cuttings in water for 1-4 hours, cut end down, "asparagus style," can help prevent cuttings from drying out. Cuttings arrive bundled to make this easy.
- A rooting hormone is recommended to promote early, uniform rooting. IBA at 1,000 ppm dip is preferred.
- Soil temperature should be maintained at 68 to 72°F (20 to 22°C) until roots are visible.
- Mist heavily in the first few days to prevent desiccation. Reduce mist after 4 to 5 days to prevent excess water in the media. Too wet media will result in heavy callus and slow rooting.
- Begin fertilization when roots become visible with 75 to 100 ppm N. Increase to 150 to 200 ppm N as roots develop.
- Pinching is used to remove the first bloom, and to increase fill for larger containers. It is not needed with some varieties. Configure can be applied to enhance branching in no-pinch scenarios.
- Dianthus rooted cuttings should be ready for transplanting 28 to 33 days after sticking.

Easy, bundled cuttings

Configure

Pinching

3 Weeks After Stick

GROWING ON TO FINISH

- Use media with good aeration, drainage and water-holding capacity. Maintain pH 5.8-6.4.
- Dianthus should be grown cool or cold, depending on the type of production. See scheduling chart on page 19.
- For cold season production, grow in high light conditions.
- Feed regularly at 200-300 ppm N from a complete 17-5-17 cal-mag formula fertilizer.
- Avoid dramatic swings in media moisture to avoid root rot and other diseases.
- Watch for Alternaria leaf spot. This fungal pathogen is the most common disease.
- When grown cool, dianthus will need little or no PGR. When needed from warm temperatures and/or vigorous varieties, PGR options include paclobutrazol sprays at 1-2 ppm, B-Nine at 2,500 ppm or Cycocel at 500-750 ppm.

Selecta One varieties are available as rooted cuttings from Selecta One licensed Root & Sell Stations. Contact your favorite broker for ordering details.
