Season: Early Season	Foliage: dark green	Natural Flower (first pollen): Nov. 16-20		Response Time in weeks (first pollen): 7.5		Vigor: medium	Average Bract Size: large, pointed	Post Harvest:
	ecommendatio							
Energy Effi	cient: (see note	I) Cool Fir	ish (24 hrs avg.):	(see note 2)	Space Efficient: (see note 1)	Recomme	ended spacing for 6":	
Containers								
2.5" Mini:	4 - 5": 6":	8": 10"	Tree/Pyramid					

Varieties are rated from most ( ) to least ( ) efficient. Contact us for guides.

Indicates minimum temperature starting two weeks after the beginning of short days. Please note that a crop grown cooler requires more time to finish (4 to 7 days), and will have smaller bracts and darker color (for example, white may turn cream-yellow). Toward the end of the crop (two weeks prior to shipping), slowly lower the temperature for green-leafed varieties to 65°F (18°C) day/night and dark green-leafed varieties to 63°F (17°C) day/night.

NOTE: Growers should use the information presented here as guidelines only. Selecta recommends that growers conduct a trial of products under their own conditions. Crop times will vary depending on the climate, location, time of year, and greenhouse environmental conditions. It is the responsibility of the grower to read and follow all the current label directions relating to the products. Nothing herein shall be deemed a warranty or guaranty by Selecta of any products listed herein. Selecta's terms and conditions of sale shall apply to all products listed herein.
